Reactor

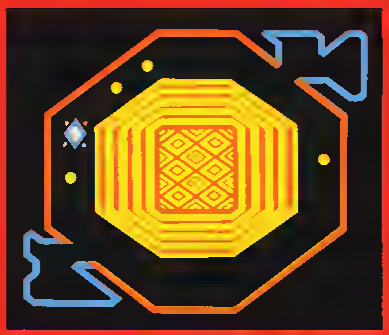
SMASHING VIDEO ACTION!

New games with new ideas are hard to find these days. REACTOR presents a totally original video game program with dazzling graphics and exciting sound effects.

Add something new to your location—introduce REACTOR. Your players will reward you with enthusiastic appreciation and lots of quarters!

SMASH THE ATOMS...
...COOL THE CORE...
...ESCAPE THE VORTEX

Smash the enemy particles into the outer wall to destroy them. But if you touch the outer wall, you too are destroyed.



The radioactive core grows and grows, making the play area smaller and more challenging. Completing your enemy quota shrinks the core.

ENERGY button gives you a superburst of power for stronger hits. Your rebound after an ENERGY hit is also more powerful, so be careful!

Bonus chambers bounce enemies trapped inside and score bonus points for each bounce. After several bounces, enemy escapes or is destoyed

DECOY button leaves an immobile player decoy that attracts the enemy. Used near the targets or bonus chamber, you can destroy the confused enemies at will.

The secret vortex core appears at advanced levels. It can pull you into its void, and you will be destroyed.
